

Solar Powered Home Pressure System

(Typical Pressure System Layout)

Project Name: _____

Project Location: _____

1. What is the size of the holding tank? _____ Gallons
2. What is the required water volume per day? _____ Gallons
3. What is the peak demand flow rate? _____ GPM
4. How many days of battery back-up is required? _____ Days
5. What is the required system cut-off pressure? _____ PSI

NOTE:
It is recommended to use a pressure switch with a low pressure cut-off.
